

Clàudia Martínez

Front-end developer

[LinkedIn](#) | claudia.martinez081996@gmail.com | 680192126 | www.claudev.io

As I gain more experience as a developer, I realize the huge impact we have on society. That's why working on meaningful projects aimed at creating a positive change in society has become essential to me.

At work, I'm not afraid of trying, evolving, and adapting to whatever comes next. After all, I think we only truly fail if we never break a piece of code—even in production! 🤪🚀

Work Experience

Frontend Developer

Atrapalo | June 2023 - currently

We're migrating to modern technologies like Next.js, React, and TypeScript while maintaining a 25-year-old legacy codebase and developing new product features—a huge mix of past and present.

Jr Fullstack Developer

Mankind Technologies | November 2021 - April 2023

My first experience as a developer involved working on different projects, mainly for startups. My stack mainly included Next.js, but I also worked with Supabase, Java Spring, Express.js, and other technologies like Sanity and Stripe. We adapted ourselves to whatever we had to!

Education and life

Studied **Advertising at UAB (2014-2018)**, worked as a marketer, left everything behind in 2020, attended to Nuclio Digital School for a **Development Bootcamp** and...**here I am!**
